

Eliakin del Rosario
Supported Project: ESGF

Quarterly Report for May 22, 2017 – June 28, 2017

Quarter Accomplishments:

- Completed Employee Orientation and Training
- Learned Git and forked esgf_installer repository from github
- Learned Flask and create first GUI draft for the esgf_installer
- Got aquatinted with Docker workflow
- Started refactoring scripts and creating test cases for the esgf_installer
- Delivered first demo of the GUI for the esgf_installer

Next Quarter's Roadmap:

- Add feedback changes to the first draft of the GUI
- Continue creating test cases and refactoring scripts
- Maintain a log of the evolution of code metrics following the pep8 standard

Resources Required to Achieve Goals:

- VM Software – Virtualbox
- A test environment (esg-idx.demonet.local)
